

ABOUT CLEAR ALIGNER

Preview Image

Clear aligners are transparent, removable trays used to straighten teeth gradually. Custom-made for each patient, they offer a discreet alternative to traditional braces and can be taken out for eating, brushing, and flossing.

CLEAR ALIGNER

The invisible way to straighten your teeth without braces. To discuss Clear Aligner in the Roseville CA area, please feel free to contact us to [schedule an appointment](#).

- Clear Aligner uses a series of clear removable aligners to straighten your teeth without metal wires or brackets.
- The aligners are made through a combination of [Dr. Sri's](#) expertise and 3-D computer imaging technology.
- You wear each set of aligners for about 2 weeks, removing them only to eat, drink, brush, and floss.
- As you replace each aligner with the next in the series, your teeth will move – little by little, week by week – until they have straightened to the final position Dr. Sri has prescribed.
- You'll visit Dr. Sri about once every 4-6 weeks to ensure that your treatment is progressing as planned.
- Total treatment time averages 9 – 15 months and the average number of aligners worn during treatment is between 18 and 30, but both will vary from case to case.
